1 SUMMARY OF SCOTT'S MEETING:

Collection of data: excel spreadsheet in whatever layout we want.

Stock taking: manual and auto(not sure if we'll have time for auto). Manual means you input what you think the data should be and then it checks in the database what it really is.

Testing the system: him and a colleague will test all the features. Then they will check that appropriate unit testing has been done.

Presentations only have to be ready on the 1st. It is interactive. So you demo the program and have slides.

Project is still the same weighting.

NB! Need to add Scott to the Ivy7493 repository as a collaborator!
