Meeting 3

David Auchterlonie (Student number: 1585335)
Ivan Von Staden (Student number: 1838664)
Jesse van der Merwe (Student number: 1829172)
Matthew Cresswell (Student number: 1834243)

2 April 2020

1 Layout of Software Framework

The following is a good layout structure, but not strictly required:

- Title page

- Contents page

- List of figures

- Intro

- Scope

- Software framework (MVC Framework)

- Detailed design

- Design rationale

- Conclusion

2 Requirements Document

What is actually expected of the requirements doc? (i.e. how are we supposed to get to 8 pages)
Primary focus: What you are going to be doing for the next 6 weeks In the context in the bigger project.

Requirements of system as a whole (high level).
These are the requirements we are going to implement in the next 6 weeks (lower level).

3 MCV Framework

Must we use the MVC Framework in our individual documents?
Need to think through how classes relate to each other.
Hierarchical structuring.
Tkinter is slightly different.

4 Group Documentation

How will group documents be submitted on Friday?
On Sakai

5 Access Levels

What are the different levels of access? I.e. what should the following be able to view/do:

- Employee

  - Viewing >Adding >Moving >Removing

- – Access to view particular collections (FINAL PRODUCT??)
- – Remove + Move
- – Different rights for different collections

- Donor ("Guest") + Customer see same screen

  - – Owner of a collection sees lots of detail (UserID, etc)
  - – 3rd party just sees statistical info - limited info
    - ∗ How many samples
    - ∗ About the samples
    - ∗ Which collection it belongs to

- Prototype vs Final
